BIOGRAPHY

Dedicated Automotive Mechatronics, with approximately 5 years of experience in the area, and a constant motivation to explore new projects in Information Technologies.

Throughout my professional and personal career, I have improved my communication, organization and coordination skills of work and projects. I actively participated in discutions related to diagnosis, probel solving, planning, design and development. Furthermore, I highlight my ability to provide assistance, advice and explanations to employees or costumers about products and services.

I am a dynamic person, always looking for new knowledge and challenges. Despite having moved away from programming professionally, I continued to develop individual projects. Additionally, I dedicated my time to creating a Home Lab, thus maintaining and active link with the programing area.
